

Froebelian principles

Unity and connectedness

Everything in the universe is connected. The more one is aware of this unity, the deeper the understanding of oneself, others, nature and the wider world. Children are whole beings whose thoughts, feelings and actions are interrelated. Young children learn in a holistic way and learning should never be compartmentalised for everything links.

Autonomous learners

Each child is unique and what children can do rather than what they cannot, is the starting point for a child's learning. Children learn best by doing things for themselves and from becoming more aware of their own learning. Froebelian educators respect children for who they are and value them for their efforts. Helping children to reflect is a key feature of a Froebelian education.

The value of childhood in its own right

Childhood is not merely a preparation for the next stage in learning. Learning begins at birth and continues throughout life.

Relationships matter

The relationships of every child with themselves, their parents, carers, family and wider community are valued. Relationships are of central importance in a child's life.

Creativity and the power of symbols

Creativity is about children representing their own ideas in their own way, supported by a nurturing environment and people. As children begin to use and make symbols they express their inner thoughts and ideas and make meaning. Over time, literal reflections of everyday life, community and culture become more abstract and nuanced.

The central importance of play

Play is part of being human and helps children to relate their inner worlds of feelings, ideas and lived experiences taking them to new levels of thinking, feeling, imagining and creating and is a resource for the future. Children have ownership of their play. Froebelian education values the contribution of adults offering 'freedom with guidance' to enrich play as a learning context.

Engaging with nature

Experience and understanding of nature and our place in it, is an essential aspect of Froebelian practice. Through real life experiences, children learn about the interrelationship of all living things. This helps them to think about the bigger questions of the environment, sustainability and climate change.

Knowledgeable, nurturing educators

Early childhood educators who engage in their own learning and believe in principled and reflective practice are a key aspect of a Froebelian approach. Froebelian educators facilitate and guide, rather than instruct. They provide rich real life experiences and observe children carefully, supporting and extending their interests through 'freedom with guidance'.
